Minimum order shipped \$5.00. ADD \$1.00 TO EACH ORDER to help on packing and postage costs. We ship every order Special Delivery (Special Handling rural) to assure package being placed in coach with mail employees to look after it; insured mail is NOT. We guarantee safe arrival.

FREE GIFTS: Select additional \$1.00 value for every \$10.00 or more order; \$2.00 gifts for \$15.00 or more order; add \$1.00 gifts for each additional \$5.00 purchase. BUT GIFTS CANNOT BE SELECTED FROM VARIETIES OF WHICH WE HAVE LIMITED STOCK.

CUTTINGS, to us, had meant parent leaf with attached young plants ready to divide, but many are now calling a rooted leaf a cutting; therefore, we discontinue the word "cutting" and use the term "leaf setting" (L.S.). In most cases, plantlets will be ready to divide and pot separately; in a very few cases, with very late varieties, they might be too young to divide, in which case re-set the entire setting in peatmoss-sand mixture, turn a glass over it for a week until it is established, and let it grow until larger before dividing. Also, young plantlets do better if set in a mix like this until they grow a heavy root system. Settings average three plantlets; some produce only one or 2 plantlets, but we always try to strike a good average for you.

We do not mail large blooming plants, but specialize in quality leaf settings and young plants. Large plants always available at our greenhouse at very low cost. We absolutely guarantee our plants to be free of nematodes; you can safely accept our word.
